Preface

Participatory Capacity Building is a practical toolbox for internal or external facilitators of capacity building of NGOs. The tools can be used to assess an organisation's capacity and plan for strategic and innovative directions for organisational improvement.

Dangers of the Toolbox
As with all facilitation methods the methodology presented in this toolbox should be used with care, as it must be adapted to every situation to use in. As much as we have tried to be specific and detailed on the facilitation steps, this Toolbox should not be taken as a blueprint for facilitation. Facilitating Participatory Capacity Building needs a lot of creativity, courage and involvement both from the facilitator and the participating organisation(s). We hope it provides a meaningful vehicle for sustainable improvement of NGO capacity.

Skilled Facilitators
We want to encourage all practitioners to build their facilitation skills. Especially courses in Group Facilitation Methods and Participatory Strategic Planning, offered by the Institute of Cultural Affairs (ICA) all over the world, will provide helpful skills and knowledge to facilitate Participatory Capacity Building processes. See Section 1.4 for more information.

Acknowledgements
Participatory Capacity Building uses the Participatory Organisational Assessment Tool (POET), developed by UNDP and is based on Technology of Participation® (ToP®) Methods developed by the Institute of Cultural Affairs (ICA), as they apply to capacity building situations. We owe special gratitude to the developers of POET and ToP®. We also want to thank co-financing organisations ICCO-PSa and PSO for their support to the NANGO Capacity Building Program, which laid the foundation for this toolbox.

Use of the materials
We want to encourage everyone to apply the processes from this toolbox using all available materials. Please feel free to photocopy or print what you need from the toolbox or cd-rom and distribute the information widely, if the original text is properly acknowledged and the objective is not for profit or gain. The toolbox and cd-rom were designed for facilitation purposes only. Large-scale reproduction, widespread distribution, or inclusion of any materials in publications for sale or third party training is prohibited without prior written permission of the publisher. Please send requests to:

## Contents

### 1. Introduction to the Process
- 1.1 Introduction to the Process 3
- 1.2 Capacity Building for Non Governmental Organisations 4
- 1.3 What is the Participatory Organisational Evaluation Tool? 10
- 1.4 What is Technology of Participation? 13
- 1.5 The Facilitator 15
- 1.6 Field Experiences: the NANGO Case 18

### 2. Participatory Capacity Assessment
- 2.1 Introduction 23
- 2.2 Preparations 24
- 2.3 Participatory Capacity Assessment 25
  - 2.3.1 Introduction to Participatory Capacity Assessment 26
  - 2.3.2 Capacity Assessment 1 29
  - 2.3.3 Capacity Assessments 2-4 30
  - 2.3.4 Presentation of First Assessment Results 31
  - 2.3.5 Capacity Assessments 5-7 32
  - 2.3.6 Presentation of Second Assessment Results 33
  - 2.3.7 Next Steps and Closing Reflection 34

### 3. Analysing and Reporting PCA Scores
- 3.1 Introduction 37
- 3.2 PCA Calculator 38
- 3.3 PCA Report 42
- 3.4 PCA Cohort Calculator 48

### 4. Feedback and Capacity Planning Workshop
- 4.1 Introduction 57
- 4.2 Preparations and Program Overview 58
- 4.3 Overview: Feedback and Capacity Planning Workshop 60
  - 4.3.1 Introduction and Objectives 61
  - 4.3.2 Presentation and Interpretation of PCA Scores 63
  - 4.3.3 Practical Vision: Envisioning the Future Capacity 67
  - 4.3.4 Underlying Contradictions: Determining the Blocks 69
  - 4.3.5 Strategic Directions: New Avenues for Capacity Building 73
  - 4.3.6 Next Steps and Closing Reflection 77

### 5. Implementation Planning Workshop
- 5.1 Introduction 81
- 5.2 Preparations 82
- 5.3 Overview: Implementation Planning Workshop 83

### 6. NGO Capacity Building Co-ordination Workshop
- 6.1 Introduction 91
- 6.2 Preparations and Program Overview 92
- 6.3 Overview: NGO Co-ordination Workshop 94
  - 6.3.1 Introduction 95
  - 6.3.2 Reflection on Participatory Capacity Building Process 96
  - 6.3.3 Synthesising the Capacity Building Directions 97
  - 6.3.4 Developing a Joint Capacity Building Program 99
  - 6.3.5 Discussing Program Management 100

### 7. Monitoring and Evaluation of Capacity Building
- 7.1 Introduction 103
- 7.2 Developing a Monitoring and Evaluation System 104
- 7.3 Tracking Progress: Follow-up Meetings 106
- 7.4 Qualitative Monitoring and Evaluation 108
- 7.5 PCB Impact Assessment Workshop 111
  - 7.5.1 Introduction to Impact Assessment 113
  - 7.5.2 Impact Assessment of Capacity Areas 115
  - 7.5.3 Planning Ways Forward in Capacity Building 117
  - 7.5.4 Closing Reflection 118
  - 7.5.5 Calculating Impact Assessment Scores 119

### Appendices
- A. Introduction to NGO Assessment 123
- B. PCA Facilitator’s Questionnaire 126
- C. PCA Member’s Questionnaire 137
- D. Individual PCA Score Sheet 145
- E. Manual PCA Worksheets 146
- F. PCA Report Introduction 154
- G. Overview of PCA Scores 156
- H. PCA Report Example 165
- I. Instructions to FPW presentations 181
- J. Organisational Questionnaire 182
- K. PBC Impact Assess. Questionnaire 183
- L. Individual PCB Impact Score Sheet 191
- M. About the Toolbox and the Author 192
- N. Who is ICA-Zimbabwe? 193
1. Introduction to the Process
1.1 Introduction to the Toolbox

In this first Chapter we introduce the process of Participatory Capacity Building starting off with a paper on Capacity Building for NGOs, which puts this Toolbox in a broader perspective. Then two ‘methodologies’ will be introduced: Participatory Organisational Evaluation Tool (POET) and Technology of Participation® (ToP)®. This Toolbox builds on both of them. This introduction continues with a section on the role of the facilitator in Participatory Capacity Building. Finally we share experiences with this toolbox as it was developed for and applied with NGOs in Zimbabwe.

After the introduction to the process the Toolbox continues with 6 Chapters containing the actual tools for Participatory Capacity Building:

2. Participatory Capacity Assessment: the process to facilitate self-assessment of NGO Capacity;
3. Analysing and Reporting Participatory Capacity Assessment Scores: the frameworks to reflect on the assessment results;
4. Feedback and Capacity Planning Workshop: the process to facilitate reflection on results and strategic capacity planning;
5. Implementation Planning: tools for putting wheels under the capacity building plan;
6. NGO Capacity Building Co-ordination Workshop: the processes for collaborative action of NGOs;
7. Monitoring and Evaluation of Capacity Building: the frameworks and processes to keep track of progress of capacity building efforts.
1.2 Capacity Building for Non Governmental Organisations

Introduction

It has been widely acknowledged that insufficient capacity of development organisations hinders sustainable development. This problem however cannot simply be defined in terms of gaps in human resources, financial resources or training. The issue is a function of several aspects: limited sense of local ownership of the development processes; excessive dependency on external resources and technical assistance; inadequate considerations of broader environmental or systems factors; and poor integration and co-ordination of multiple development initiatives.

In the past decade there has been much debate and research on the efficacy of technical co-operation and the issue of capacity building. It led to better understanding of development processes and the changes necessary to make development initiatives more successful and sustainable.

This paper will introduce the concept of capacity building for Non Governmental Organisations focusing on an approach that capacitates organisations from within, rather than from the outside. Just as we want to create sustainable change from within the community, capacity building should start from where organisations are, creating change from within.

Introduction to Capacity Building

Capacity is defined as the ability of individuals and organisations to perform functions effectively, efficiently and sustainably. Capacity is the power of something (a system, an organisation, a person) to perform or to produce.

To clarify capacity in its context it is necessary to answer the question: capacity for what? Here we narrow down capacity as the ability to solve a problem, to achieve or sustain a mission, to reach a set of objectives. Non governmental organisations need capacity to achieve their planned objectives, to have an impact and to fulfil their organisational purpose.

Capacity building is broader than organisational development, since it includes the overall system, environment or context in which individuals, organisations and societies operate and interact. It is the process by which individuals, groups, organisations, institutions and societies increase their abilities to: (1) perform core functions, solve problems, define and achieve objectives; and (2) understand and deal with their development needs in a broad context and in a sustainable manner.

Capacity building is closely linked to the concept of learning organisations. A learning organisation is one that constantly changes and experiments by using feedback of its results to change its form and processes in ways that make it more successful. Capacity building can be seen as transforming the culture and structural designs of organisations to become real learning organisations.

Capacity building is a continuous and reciprocal process of adjusting people’s attitudes, values and organisational practises while building up appropriate knowledge and skills among various stakeholders in a partnership – to strengthen each partner’s ability to make effective decisions about their own lives and to take full responsibility of the consequences of such decisions.
**Dimensions of Capacity in a systems context**

Capacity issues can be analysed at three levels (figure 1). Often capacity building is only addressed at the individual and organisational level. However, capacity should be understood at the systems level as well. The system is a regularly interacting or interdependent group of items forming a unified whole. All three levels must be included when assessing and planning capacity to create meaningful change.

1. **The System**
   The highest level of capacity is the broader system or enabling environment level. For some national NGOs this level covers the entire country or region they work in and all the sub-components that are involved. For other NGOs that work more sectoral (eg. health) the system would only include those relevant components.

   The systems level includes both formal and informal organisations. Only the key organisations or stakeholder within the context of the NGO are relevant, looking at the nature of the relationships between the entities. (See figure 2)

---

**Figure 1**

---

**Levels of Capacity – within a systems context**

- **Level 1:** The Broader System
  - **Level 2:** The Entity
  - **Level 3:** The individual

---

2. **The Entity or Organisation**
   There are typical dimensions that need to be assessed and developed at the organisational level. (see figure 3)
Unlike traditional capacity development and organisational strengthening which focuses on human resources, processes and organisational structures, a more comprehensive approach examines all dimensions of capacity at entity level, including its interactions within the system.

This also applies to organisational sub-units within the entity, such as project teams, work-groups etc.

Dimensions of Capacity at the Entity Level:
- Human Resource Management: the most valuable of the entity’s resources and upon which change, capacity and development primarily depend.
- Financial Resource Management: both operating and capital, required for the efficient and effective functioning of the NGO, including fund-raising.
- Equitable Participation: involvement of local knowledge and stakeholders related to project access and project benefit.
- Sustainability of Program Benefits: impact of the NGOs work looking at different aspects like environmental, economic, political, institutional and cultural factors.
- Partnering: collaboration with other NGOs, donors, policy makers, and private sector entities.
- Organisational Learning: teamwork, information-sharing and capacity for generating information that leads to improvement of current practice.
- Strategic Management / Governance: board practices, planning, commitment to goals, mission and philosophy or culture.

3. The Individual
The individual level is a major dimension of capacity – people, including small interpersonal networks of individuals. The individual level includes the involved management, professionals, support staff but also those who are beneficiaries or are otherwise impacted by the NGOs work (specific client groups, segments of society, etc.).

This level addresses the individual’s capacity to function efficiently and effectively within the entity and within the broader system.

Often, capacity building focuses on individual skills and knowledge needed to perform job descriptions or positions. Increasingly, the dimensions of accountability, performance, values and ethics, incentives and security are becoming more important at this level.

Capacity Building Processes
Capacity building must be regarded as an organisation-wide process, involving many dimensions of the organisation and its environment. Human Resource development is critical within this process, but it is not just limited to skills and knowledge development (e.g. through training). The process of ‘skilling-up’ involves expressing thoughts and voicing opinions – the essence of meaningful contributions to capacity building from within.

There are some stages to define in capacity building:
1. Setting the stage and formulating the ‘entry point’ of the process
2. Capacity assessment
3. Strategic capacity planning and bench marking
